

Students spend more than 75% of school time doing intense, visual work less than a foot from their eyes.

Vision is often an overlooked component of learning and reading problems. August was declared Vision & Learning Month in 1995 with a proclamation from President Bill Clinton. The goal of this national observance is to help educate parents and school professionals about the critical link between vision and learning.

Vision Stats:

1 in 10 children has a **vision problem** significant enough to impact learning.

“20/20” only means a child can see at a distance but may **lack skills needed for learning**, such as eye tracking, coordinating, and focusing.

Typical vision screenings can miss **at least 50%** of vision problems.

KANSAS CITY
VISION PERFORMANCE CENTER

Workshop: **The Vision & Learning Link**

Please attend our interactive vision workshop for parents, educators, and professionals.

- Learn how the way children “see” the world affects their behavior.
- Participate in a developmental vision evaluation.
- Learn how enhancing vision performance builds school success.
- Learn how to perform basic assessments and tests of vision skills.
- Have open discussions with Dr. Metzger and his team of vision therapists.

When Saturday, October 8, 2016
10:30 am to 12:30 pm

Where Office of Dr. John C. Metzger
Corporate Woods
10875 Grandview Dr., Suite 2260
Overland Park, Kansas 66210
